Rajnikant Dhar Dwivedi

rajnikantdhardwivedi@gmail.com

SUMMARY:

Full Stack Developer with 6 years of hands-on experience in both front-end and backend development, along with a solid understanding of DevOps practices.
Currently pursuing a Bachelor of Computer Applications (BCA) at Chandigarh University,
I have developed and deployed web applications using modern technologies such as React, Node.js,Express, Python, and Docker.My expertise spans across building scalable and responsive applications, optimizing performance, and integrating continuous deployment pipelines.

EDUCATION:

Chandigarh University 2024 – 2027

Bachelor of Computer Application

Thesis: "Accelerating Machine Learning Algorithms with Adaptive Sampling"

Areas: deep learning, randomized algorithms

Advisors: Sebastian Thrun and Chris Piech

Received over ***$20,000*** *in fellowships*

Certified Kubernetes Administrator (CKA) –

AWS Certified Developer – Associate – ***2021***

DevOps for Developers – [Stanford Online] ***2022***

JavaScript Algorithms and Data Structures – Sanford Online

Relevant Coursework: Data Structures, Algorithms, Web Development, Cloud Computing, Database Management, Operating Systems, Software Engineering

CCNA From NIIT Foundation, New Delhi June 2022

DevOps From Stanford Online April 2021

INDUSTRY EXPERIENCE:

Full Stack Developer (Freelance) January 2018 – Present

- Designed and developed web applications from the ground up, focusing on both front-end and back-end.
- Built responsive and user-friendly web interfaces using React, HTML, CSS, and JavaScript.
- Managed databases (MongoDB, MySQL) and optimized queries for performance and scalability.
- Developed RESTful APIs and integrated with various back-end systems using Node.js and Express.
- Managed databases (MongoDB, MySQL) and optimized queries for performance and scalability.
- Implemented continuous integration and deployment (CI/CD) pipelines using Jenkins and Docker.

TECHNICAL SKILLS

2014 – 2015

- Languages: JavaScript, Python, Java, C++, HTML5, CSS3, SQL, PHP
- Frameworks: React, Node.js, Express.js, Angular, Django, Spring Boot
- DevOps Tools: Docker, Kubernetes, Jenkins, Git, CI/CD
- Databases: MySQL, MongoDB, PostgreSQL
- Version Control: Git, GitHub, Bitbucket
- Cloud Platforms: AWS, Azure, Google Cloud
- Web Technologies: REST APIs, GraphQL, WebSockets

PROJECTS

E-Commerce Website

- Built a fully functional e-commerce website with product listings, shopping cart, and order management.
- Front-end developed using React.js and Bootstrap; back-end with Node.js and Express.js.
- Integrated Stripe for secure payments and MongoDB for product and user data storage.

Real-Time Chat Application

- Developed a real-time chat application with WebSocket for live communication between users.
- Implemented user authentication using JWT (JSON Web Tokens) and secured chat messages.
- Deployed application using Docker and Kubernetes for seamless scalability.

Personal Blog Platform

- Designed and developed a blogging platform where users can write, edit, and comment on posts.
- Utilized Django for the back-end and React for the front-end.
- Hosted the application on AWS with continuous deployment pipelines for easy updates.
